Full-stack web developer with an affinity for front-end development, skilled in JavaScript & React. My interest in web development started at the beginning of 2020 when the pandemic emerged. I then completed a MERN Stack bootcamp with Trilogy - now edX - in 2021. In addition to my technical skills, over the course of my career I've accumulated savvy in trouble shooting, creative problem solving, client needs assessment & business requirements, adaptive communication, leadership, and graphic design via my background as a musician artist, social worker, high-volume bartender, and teacher. Actively seeking a full-time developer role where I'm able to employ the abilities I currently have, as well as the skills developed in my new role.

TECHNICAL SKILLS

JavaScript | React | Node | Express

Git | HTML | CSS | Responsive Design | APIs | PWAs

MySQL | MongoDB | Unit Testing | G Suite

EXPERIENCE
